Vplanter™

PLANTER FOR CREATING YOUR OWN VERTICAL GARDEN

Living in an urban area with limited green space?
V Planter can help maximize your space for growing flowers, herbs and plants. You can enjoy gardening and surround yourself with the beauty of nature, even if you have little space.

V Planter is the modular planter for DIY vertical gardens, inspired by growing on cliffs. You can easily hook each planter together without any tools and arrange them into different sizes and layouts. With V Planter, you can build your dream vertical garden uniquely with ease living wall and green wall.

**V PLANTER IS EASY TO BUILD,
WITH A MODERN DESIGN,
AND CUSTOMIZABLE LAYOUTS.**

**Plants shown in the photo are not part of the V Planter range

Nurturing and caring for real plants is a task that many of us find time consuming, tiresome and sometimes futile. Whether you are leading a busy life, suffer from plant related allergies or simple don't have the penchant for gardening, **EVERGREEN BLOOM** are for you.

EVERGREEN BLOOM the perfect alternative to needy natural plants. They look fresh year after year, will 'grow' in any environment and won't die if you forget to water them. They're also low maintenance, so bar a quick dust here and there, require no ongoing care.

Styling your homes interior and garden with artificial greenery used to be frowned upon. Faux plants were renowned for being made from rigid shiny plastic. This is no longer the case. Manufacturing techniques have improved significantly allowing artificial plants to be produced in all shapes and sizes, from high quality fabrics and flexible plastics making them nearly identical to their botanical counterparts.

The logo for Evergreen WALLS features the word "Evergreen" in a cursive script with a green leaf icon above the 'v', and "WALLS" in a bold, sans-serif font below it.The GLO logo consists of the letters "GLO" in a bold, sans-serif font, with a red circle containing a white dot above the "O". Below the letters is the tagline "SPICE UP YOUR SURFACES" in a smaller, sans-serif font.

Evergreen Wall is a vertical partition covered with greens and flowers which are fixed on plastic base. Evergreen Wall is also known as **Vertical Garden**. Evergreen Wall has plastic container in a ladder form as a base on which varieties of artificial greens are planted to create a wall or division. Our artificial Evergreen Walls are **'Easy to Install'** and **'Zero Maintenance'** products as these are artificial and do not require any sunlight or watering.

Gone are the days when artificial plants and flowers were clearly artificial. Our artificial plants give realistic look and feel, which is difficult to distinguish from the originals. Artificial plants are now being used more and more in people's homes, as well as in offices and high-profile environments as there is no maintenance at all.

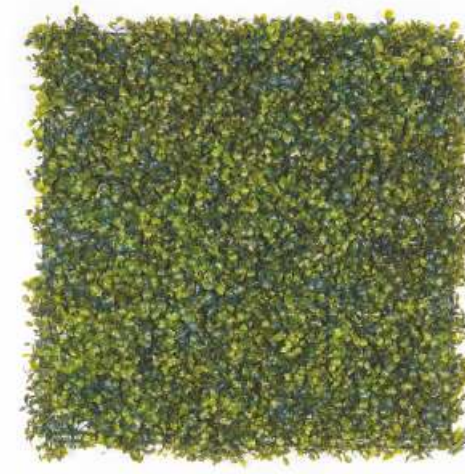

UV Protected 5 Years Warranty for Exterior Application

Evergreen Walls can be used for both - indoor and outdoor use. Outdoor products are exposed to all types of weather and can sustain UV Rays, Rain and Cold for about 5 years depending on the location.
